

Intelligence Unleashed, Data at Your Command

Transform your data and business processes into outcomes that enable mission success and operational resiliency.

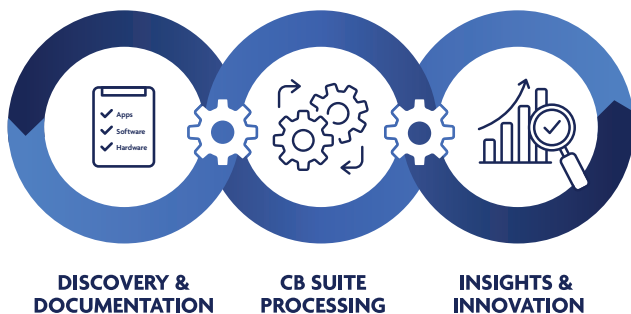

At Pantheon Data, we bring our domain expertise, trusted partnerships, and passion for efficient workflows to the spaces that lead our nation. No matter where you start on your journey with us, you'll experience innovation and modernization throughout your IT environment allowing you to drive strategic decisions through authoritative insights.

CB Suite: From Input to Insight

CB Suite is a customizable data framework that leverages automation and intelligence to organize and manage disparate and siloed datasets across multiple network domains. It improves your information management experience regardless of the complexity to deliver data-driven insights for clear decision making.

Revolutionary by Design

CB Suite is built on mature trained models but can be customized to leverage its cutting edge technologies such as Optical Character Recognition (OCR), Natural Language Processing (NLP), document classification, image recognition, handwriting analysis, and more.

Tangible Outcomes

-  Translate siloed datasets into structured content
-  Link hardware to software/ applications at scale
-  Automate file sorting, extraction, and reporting
-  Modernize legacy applications for seamless integration
-  Display real-time insights through interactive dashboards
-  Enhance situational awareness through predictive analysis
